

YOUJIN KIM

Blockchain Security & Forensics Engineer

Seoul, South Korea | yujin5836@gmail.com | +82 10-9849-4486 | github.com/u0jin

SUMMARY

Information Security M.S. candidate at Korea University specializing in blockchain forensics, on-chain anomaly detection, and cryptocurrency threat intelligence. Built multiple forensic tools that trace illicit transactions and score fraud risk across Bitcoin and Ethereum. KITRI Best of the Best (BoB) alumnus and published researcher in Bitcoin anomaly detection, with hands-on experience in smart contract security auditing and reverse engineering.

CORE COMPETENCIES

Blockchain Forensics & Transaction Tracing (Bitcoin, Ethereum) · On-chain Anomaly & Fraud Detection / Risk Scoring (FDS) · Cryptocurrency AML & Suspicious-Transaction Screening · Smart Contract Security Auditing (Solidity) · Reverse Engineering (IDA Pro)

TECHNICAL SKILLS

Languages & Tools: Python, Solidity, JavaScript / React, SQL, Git & GitHub, IDA Pro

Libraries & Frameworks: Pandas, NumPy, NetworkX, Streamlit, Next.js

Domains: Crypto Forensics, Anomaly & Fraud Detection, AML, Smart Contract Security, Data Visualization & Network Analysis

EDUCATION

M.S. in Information Security | Korea University, School of Cybersecurity — 2021 – Present

- Graduate Researcher developing cryptocurrency forensic tools (BTC & ETH Anomaly Lens) that automate on-chain anomaly detection and transaction risk scoring.
- First-authored “*Analyzing Transaction Patterns of Bitcoin Crime Wallet Networks: A Time-Series and Topological Modeling Approach*” (JKIISC, Vol. 35, No. 3, 2025; DOI).
- Analyzed 347,779 suspicious Bitcoin addresses (2017–2024) across ransomware, sextortion, tumbler, and blackmail-scam types, modeling wallet networks with time-series and topological methods to flag illicit flows.

B.S. in Computer Science | Seokyeong University — 2017 – 2021

EXPERIENCE

Founder & Full-Stack Developer | LUWEI — Global Wellness Platform (Solo-Founded) — 2025 – Present

- Built and operate a four-language global wellness platform (Next.js, Supabase, Vercel, Cloudflare) covering 400+ venues across 30 countries.
- Grew the platform to 10,000+ monthly views with multiple first-page Google rankings; shipped companion iOS and Android apps as a solo developer.

Regional Support & Gold Panelist | Microsoft Learn Student Ambassadors Korea — 2021 – 2023

- Hosted technical sessions at Microsoft Build Korea 2021 and Global Azure 2021 on blockchain security and cloud computing.
- Coordinated Microsoft-sponsored coding events and hackathons.

Platform QA & Supporter | Elice, Inc. — Jan 2018 – Dec 2018

- Conducted quality assurance (QA) testing to improve interactive online coding courses.
- Provided curriculum and UX feedback that enhanced learner satisfaction.

KEY PROJECTS

ETH Anomaly Lens

Jul 2025

Ethereum smart contract security analysis tool detecting risky function calls (selfdestruct, delegatecall, tx.origin) via an automated vulnerability-detection engine. *Tech: Solidity, Python, Streamlit*

BTC Anomaly Korea Signal

Jun – Jul 2025

Forensic tool identifying cryptocurrency anomalies tied to Korea-based financial-crime patterns, using targeted regional detection models. *Tech: Python, Streamlit, Blockchain Forensics*

BTC Anomaly Lens

Jan 2025

Real-time Bitcoin transaction anomaly detection with automated risk scoring, blacklist scanning, dynamic fee analysis, and time-series detection. *Tech: Python, Streamlit, NetworkX*

Coding Education Platform for Beginners

2021

Beginner-friendly web-based coding platform with syntax highlighting, real-time error feedback, and learner hints. *Tech: JavaScript, HTML/CSS*

Sensitive Data Detection Tool

2019

Text and code scanning tool detecting personal identifiers and sensitive data through static analysis and regex-based modeling. *Tech: Python, Regular Expressions, Static Analysis*

HONORS & AWARDS

- KITRI Best of the Best (BoB) 8th — Vulnerability Analysis Track (2019)
- Microsoft Learn Student Ambassador — Gold Milestone (2021–2023)
- GoPax Guardians 1st Generation — Blockchain Security (2023)
- Invited Presenter — Microsoft Build Korea 2021 & Global Azure 2021
- Blockchain Specialist Program Certificate — KITRI (2019)
- UNITHON 7th Special Award — Team PoseBlock (2018) · SW Contribution Program, Korea SW Industry Association (2018)

ORGANIZATIONS & LANGUAGES

Organization: Member / Author, Korea Institute of Information Security & Cryptology (KIISC), 2025–Present

Languages: Korean (Native) · English (Professional Working Proficiency)
